To whom this may concern,

RE: Hazrul Akmal Hazardin Referral Letter

It is my pleasure to strongly recommend Hazrul Akmal Hazardin for your company.

I am Yeoh Yih An, a Director of Pin Wah Auto Supply Sdn Bhd, where I have for the past 20 years. In my time at Pin Wah, I have worked with many external programmers and IT developers in attempts to digitize the previously analog business, and working with Hazrul along with his team at Data Analytics Consultancy Network has been especially pleasant.

During our project together in September to November 2021, Hazrul has displayed upmost professionalism, responsiveness and skill in cleaning, breaking down and analyzing the sales and purchase datasets we had stored in our point-of-sales system. The work produced by Hazrul and team has been helpful in demonstrating to us the importance of data analytics, which we had overlooked before, in driving business decisions.

It was a delight working with them. As someone who is not the most familiar with technology and data analytics, Hazrul impressed me most when explaining the mechanics, use and interpretation of the functions and outputs of unfamiliar software, PowerBI. Hazrul and the team was accommodating and spoke with simple, clear language, demonstrating high competence in their skills.

Thus, I would highly recommend working with Hazrul. I am confident he will flourish in his role with your company.

Yours sincerely,
